PROFESSIONAL SUMMARY

Full Stack Software Developer with 5+ years of experience building scalable mobile and backend systems using Flutter, Node.js (Express), and MongoDB. Strong expertise in REST API design, RBAC authorization, workflow-driven systems, and end-to-end product development. Experienced in version control, automation using OpenHands CLI, and backend integrations using Supabase.

EDUCATION

Pune University

Pune, India

Bachelor of Engineering – Computer Science

SKILLS

Primary Stack Flutter, Node.js, Express.js, MongoDB, MongoDB, Supabase

Tools & Workflow Git, GitHub, Version Control, OpenHands CLI

Architecture Clean Architecture, SOLID Principles, REST Design

PRODUCT EXPERIENCE

Doshaheen — Software Developer, Pune

Product: Compliance & Risk Management Platform

- Built scalable backend services using Node.js, Express, and MongoDB.
- Developed Flutter-based interfaces for workflow management and user interaction.
- Designed secure REST APIs with RBAC-based authorization and validation layers.
- Implemented document workflows with audit trails and version control logic.
- Integrated Supabase for backend services and real-time capabilities.
- Managed codebase using Git with structured branching and version control practices.
- Leveraged OpenHands CLI for automation and developer productivity.

DentalDost — Software Developer, Pune

Product: Healthcare Platform

- Developed REST APIs using Node.js and Express for healthcare workflows.
- Built Flutter mobile applications for patient and doctor interactions.
- Integrated Flutter apps with backend APIs for seamless data flow.
- Implemented secure authentication and role-based access control.
- Managed structured data storage using MongoDB.
- Used Git for version control and collaborative development.

SERVICE EXPERIENCE

Ergobite — Software Developer, Pune

Project: Meal Delivery Platform

- Developed backend APIs using Node.js, Express, and MongoDB.
- Built Flutter applications for customer and delivery workflows.
- Designed order lifecycle and state transition workflows.
- Integrated frontend Flutter apps with backend services.
- Implemented authentication and RBAC systems.
- Maintained version-controlled codebase using Git.

ScriptLanes — Software Developer, Pune

Projects: Multi-domain Applications

- Built scalable backend services using Node.js and Express.

- Developed Flutter applications integrated with REST APIs.
- Designed end-to-end systems combining Flutter frontends and backend services.
- Managed MongoDB databases for high-performance applications.
- Followed clean architecture and version control best practices using Git.
